

**ROYAL COATINGS**

# Easy Prep

## WATER BASED SURFACE CONDITIONER

Easy Prep is a nonhazardous biodegradable dual purpose cleaner used in combination with hydro-blasting. Surface contaminants are more easily removed and surfaces left cleaner with Easy Prep. In addition, old epoxy coatings left on the surface are micro-etched providing a perfect surface for mechanical adhesion. Note: Easy Prep can not be used effectively with Novolac epoxies due to the surface hardness of that technology.

**INSTRUCTIONS: (Coverage: 120 m<sup>2</sup>/liter or 5,000 ft<sup>2</sup>/gallon)**

**Dilute Easy Prep about 1:1 with fresh water.**

Apply liberally to the old coatings and let stand 15-20 minutes. High pressure water blast at 10,000 psi with rotating nozzle only or vigorous scrubbing with hard bristle brush. Ensure Easy Prep is completely washed off the surface with fresh water prior to painting.

### Technical Data

Packaging	5 Gal (19 liter) plastic pails
Color	Clear
Flash Point	None
Ph	11 -12
Biodegradability	Complete
Hazardous Content	None

### **CAUTION:**

Easy Prep is an alkaline cleaner and care should be taken to prevent eye contact or prolonged skin contact. Wear protective eye shields and waterproof gloves. See the MSDS for information.
